coatings in South Africa

Dekro Group products are marketed direct
from factories, depots, agents and stockists
under trade names which include Dekro
Paints, Advanced Coatings, New Era, PRP
Resins and certain client-owner
names. Paint with

The Importance of a Paint Specification:

The paint specification must stipulate which products are required (or product characteristics that must be satisfied) and how they need to be applied, as well as the surface preparation required for the job.

These are the core elements of a paint redecoration specification.

Surface Preparation:

Surface preparation before painting external walls is important because it helps the paint adhere better and last longer. It also prevents paint issues like peeling, blistering, and chipping.

Specified Products

- Dekro Plaster & Masonry Primer
- Fibre Reinforced
- Xterior Guard
- Pure Matt Acrylic
- Non Drip Enamel
- Timbertek
- RustRite

Environmentally Friendly Coatings

Dekro's Green Generation Products, labelled with the Dekro Daisy indicating that it is friendly to both us and our environment.

It has been specifically formulated to contain zero* levels of any harmful substances including VOC's, APEO, MEG, Formaldehyde, Ammonia and Solvents.

***zero means less than 2gm/lt**

These harmful substances are either added by the manufacturer of the Raw Material or the Decorative Coating.

Currently with no legislation in RSA restricting the use of these substances it is left to the Paint Manufacturers to take the initiative and reduce these levels.

However, by careful selection from a growing range of greener alternatives it is becoming possible to develop paints which contain extremely low levels of these substances - resulting in coatings which are far less harmful to us and our environment.
